Six functions are built into u.direct to assist students with the planning process; each function determines the actions a user can take when using the software. The permissions for each function are set up in the Dashboard.

The six functions include the following:

- Roadmaps
- Plans
- Publish
- Advisor
- Administrator
- Approver
- New functionality includes the GPA Calculator.
Roadmaps:

• Roadmaps are the *school-built* driving force behind u.direct. Built from a student's audit report generated from your degree audit software (whether DARwin, u.achieve, etc), a Roadmap provides a general "map" for planning coursework.
• This general map can create a specific guideline or a general array of courses from which to choose when setting up a plan.
• The Roadmap provides a term-by-term recommendation for "best" path to graduation.
• Roadmaps can represent programs, minors, concentrations, etc.
• Roadmaps can be used to create multiple plans.
Roadmaps:

Year 1-Term 1

- 6 Hours
  - Select English courses

Year 1-Term 2

- 15 Hours
  - Take all the following Marketing courses: MKT311, 312, and 315 are considered a three-part course. Students must take and pass all three before credit is given.

Year 2

Year 2-Term 1

- 3 Hours
  - Take all the following Marketing courses: MKT311, 312, and 315 are considered a three-part course. Students must take and pass all three before credit is given.

Year 2-Term 2

- 3 Hours
  - Take all the following Marketing courses: MKT311, 312, and 315 are considered a three-part course. Students must take and pass all three before credit is given.
Plans
Plans are student-built guidelines for meeting the academic content of a degree program. Plans are designed to assist students in planning their individualized academic path, from the beginning through graduation. By using the Roadmaps for each program, users can drag-and-drop specific courses to their Plan providing guidance for all the semesters that a student will be in attendance at the university. Each plan is unique to each student. As a student progresses through their college career, the plan will continue to display past terms while only allowing changes to be made for present and future terms. Plans can be built based upon more than one Roadmap, thereby allowing for additions of minors, concentrated studies, etc.

Publish
In order for a plan to be built based upon a Roadmap, that Roadmap must first be published. This allows all users with permissions to access that Roadmap and use it to build plans for students.

Advisor
The Advisor function allows for control of the level of access an Advisor has to a student's plan. The Advisor function also allows Advisors to create and edit plans for students, as well as approve plans for students and view the plans that advisees have created. Institutions can designate if they wish to allow students to create their own plans, or if Advisors may create them and then assign them per each advisee.

Administrator
The administrator function allows for changing of the u.direct settings on a full or restricted basis.

Approver
The approver function allows an Advisor to approve a plan for a student or another Advisor without necessarily permitting them to create or edit their own plans. The approver function is an internal function designed to aid with the flow of information within an institution, school, or department.
The GPA Calculator allows you to calculate a Graduation Goal GPA that can be based upon one of several factors:
- the goal GPA you want
- the GPA you average per term
- the maximum possible GPA you can attain

From the Manage Student Plans page, select a Plan from the list of available plans: The GPA Calculator is available from the u.direct Plan Builder page:
