Intermediate Algebra

Course Mastery (132 of 261 Topics)

- Real numbers & linear equations (64 of 74)
- Systems of linear equations (3 of 16)
- Functions & logarithms (8 of 23)
- Graphs & linear functions (19 of 32)
- Rational expressions & functions (11 of 33)
- Exponents & polynomials
- Radicals & quadratic equations (7 of 47)

Click on a topic to learn.

Exponents & polynomials

- Manipulating polynomial expressions
 - Degree of a multivariate polynomial
 - Polynomial long division; Linear divisor
- Factoring
 - Solving a quadratic equation needing simplification
 - Roots of a product of polynomials
 - Solving a word problem using a quadratic equation with rational roots
 - Factoring with repeated use of the difference of squares formula
