Hello Advisement Managers,

I wanted to share a brief update on the Student Hub referral process and provide a demonstration video showing where we are in the development process so far.

As you will see in the video, the referral workflow is taking shape and we are at the point of troubleshooting the process to find bugs. Intra Edge will refine and edit the experience based on ongoing testing, feedback, and identified opportunities for improvement. While this is not the the full process or the final version, I want to ensure you are kept informed throughout each stage of development and you have visibility into the project and the functionality being built.

If interested, please take a few minutes - it's actually 30 minutes long... to review the demonstration video linked below. I will keep it available for at least a week:

Here's a OneDrive link to Referral Demo.mp4:

[Link removed, please contact your manager if you would like to review the video demo](#)

As we continue to make adjustments, I will provide updates and additional demonstrations as available, so you can stay informed of progress .

Best,

Steph
